

AUTOMATIC ROTARY NUMERATOR

MARKING MAKES COMPLETE TO YOUR PRODUCTS...

Consecutive Numbering Heads available in sizes from 1.59mm up to 6mm and from 3 wheels to 8 wheels. The numerator can have 10 surfaces on each wheel. A maximum of 6 wheels can have automatic action.

*Shanks are available in different sizes

- ☑ Consecutive serial numbers can be marked on metal parts- in a simple operation.
- ☑ Special design ensures that figures advance one at-a-time accurately and automatically.
- ☑ Impressions are perfectly aligned, evenly spaces, uniformly deep-part after part !
- ☑ On the shoulders can be made more characters to extend the marking and bring the characters closer to the progressive code.

APPLICATIONS : Name-plates for Electric Motors, Pumps, Metres; and for Engines, bicycle, Frames, Keys, etc.

The standard Ellora Automatic Rotary Numerators have six number wheels and come in the following sizes:

Size	Code	Dimensions (mm)			Character	Actual Size	Length of Impression with 6 Wheels (mm)
		A	B	C			
1/16"	6AN 062	14.4	49.3	109.0	2.50	234ABC	13.5
2.00 mm	6 AN 020	16.8	51.6	109.0	2.90	234567	15.7
3.0 mm	6 AN 030	25.3	60.2	123.0	4.32	234567	23.4
4.0 mm	6 AN 040						

Stamping characters on numerator wheels have the same style as Ellora Interchangeable Steel Types for providing a uniform appearance when marking metals labels or name plates.

Special numerators with more than six wheels, alpha or letter wheels, prefix or suffix additional types or logo for fixed data, repeat or triplicate action for 2 or 3 part components, etc. made on special order. Prices for special numerators will be quoted on request.
